

Amazanga Art

By Erez Sitzer

In 1995 Erez Sitzer traveled into the Amazonian rainforest. Beneath its rich canopy, guided by native elders, Erez discovered a world of beauty and mystery, a world that would inspire his direction in life as an artist. He was given the name Amazanga, meaning `spirit of the forest`, a word expressing for the indigenous people the complex intimations that coexist between people and plants, between dancing and dreams, between evolution and the vast skies above. It is these intimations that evoke the images and meaning in Erez`s work. For more, visit www.amazanga.com.
